

# Web Scraping

May 20, 2017

## 1 CrowdCube

The Crowdcube investments page (<https://www.crowdcube.com/investments>) contains a list of all deals on the website at any given time. However, it uses infinite scrolling, so the only way to all of the deals on the page is to keep scrolling down the page. So one way of solving this would be to use Cheerio along with something like PhantomJS to load the page headlessly and to scroll down the page when all the items are found.

```
<section class="cc-card" data-="" data-opportunity-id="21421"  
  → data-opportunity-name="Redchurch Brewery" data-opportunity-raised="148660"  
  → data-opportunity-progress="37" data-opportunity-investors="353"  
  → data-opportunity-equity="7.41">  
  </section>
```
